

# Experiential Learning

A Perfect Match for Institutions Worldwide

## A CUSTOMIZED SOLUTION

CSM's Experiential Learning offers career services staff the ability to provide the most personalized student experience. We understand that every institution has a different co-op and internship process and system which is why our Experiential Learning module is completely customizable from the initial student application to pulling tailored reports based on the experiences.

## ENHANCED REPORTING

With everything EL housed and organized in one system, institutions can provide college leadership with valuable data about what the career services office is doing to engage with employers and students. Knowing this data helps with retention and employability goals, while gaining back valuable time by easily being able to pull year-by-year comparison reports. With the robust reporting and tracking, offices can easily communicate not only with each other, but with their students and employers for evaluations, signatures, student checklists, and more.

## HOW DOES IT WORK?

The Experiential Learning (EL) module allows students to submit their internship, co-op, or apprenticeship applications which can be viewed by staff or faculty through that same portal. All proposals and applications can be approved and a student's experience can be captured, giving full visibility to staff and faculty. The Experiential Learning module also provides the ability to track hours as it relates to the experience either by course, by internship, or by the program itself. The best part is that the module is fully flexible and can configure to multiple workflows with the capability to scale and increase student engagement overall.

WHAT OUR CLIENTS ARE SAYING

“What’s kept us with CSM is the great innovation within the system that still remains very customizable... and they have one of the best customer service functions within the industry. If we’ve ever had issues with systems going down or upgrades the response is really great and people very personable, friendly, and make it a great way to interact. I have only great things to say.”

Christine Arsensault , University of Toronto, Scarborough

“Moving to a new platform was an easy decision after the University decided that every student would engage in at least one experiential learning opportunity during their academic career. Symplicity allows us to centrally support colleges and departments who offer transformative experiences through their internship courses.”

Myrna Hoover, Florida State University

“I think [Experiential Learning is] actually bringing a lot of departments together. It is helping to streamline our processes and gain a better understanding of how students can build upon the unique and high-quality experiential learning opportunities they are having through different programs. It is not only helping us save time and effort but helping us to enhance the quality of the student experience.”

Joseph Tort, Purdue University

“With Symplicity we are able to track the students that participate in our EL programs and help them in their search for placement and eventual employment. We can look at our traditionally underrepresented students and identify what resources or programming we need to engage with them more, all within our Symplicity system.”

Andrea Comsa, Georgia Institute of Technology

OUR EL MODULE OFFERS

Customization to fit your institution, no matter how big or small

Robust documentation of all experiential learning opportunities

Easy-to-use platform

Enhanced data for end-of-semester reporting

All-in-one messaging system that allows you to cross communicate to employers, students, departments, etc.
